Profile

Computer engineering student specialized in **ERP-BI**, with a growing focus on **applied AI**. During a BI internship at Amen Bank, built a banking Data Warehouse, a role-based Power BI report and a local LLM assistant; also shipped a production Odoo module. Hands-on experience in Data Warehousing, ETL, Machine Learning, and data visualization. Seeking a **6-month final-year internship** (from December 2026) in **Business Intelligence** or **Cloud**, ideally on an **AI**-related topic, a field I am eager to deepen, especially deep learning.

Education

ESPRIT School of Engineering, Ariana, Tunisia

Engineering Cycle in Computer Science – ERP-BI Specialization Sep 2024 – 2027 (Expected Graduation)

ISET'Com Tunis (Higher Institute of Technological Studies in Communication), Tunis, Tunisia

Licence in Information and Communication Technology Management (GTIC) 2021 – 2024

Professional Experience

Amen Bank – Business Intelligence Intern 2026

- Designed a star-schema Data Warehouse on SQL Server (9 dimensions, 6 fact tables) covering account openings, packs, digital and bancassurance subscriptions, fed by Talend ETL pipelines.
- Built a 4-level Power BI report (Head Office, Zone, Branch, Account Officer) with Row-Level Security so each user sees only their own scope.
- Developed a Streamlit commercial dashboard app with role-based login and a 100% local AI assistant (Ollama, Llama 3.1 8B), keeping all banking data on-premise.
- Set up Grafana dashboards and a Python health monitor to supervise the Data Warehouse and data freshness.

Exploit Consult Tunisie – Odoo ERP Developer Intern Jul – Aug 2025

- Developed and delivered a custom Odoo 12 module to automate fiscal stamp tax management across the full commercial cycle.
- Extended 3 core Odoo models (`sale.order`, `purchase.order`, `account.invoice`) using Python inheritance to separate fiscal stamp calculation from standard taxes.
- Customized XML views and QWeb PDF templates to display a dedicated fiscal stamp line across all document types.
- Validated solution end-to-end across UI, print previews, and generated PDFs, covering edge cases such as discounts and multi-tax combinations.

Automatisation et Solution d'Entreprise (ASE) – Final Year Project Intern 2024

- Designed and developed a full e-commerce website for clothing retail using WordPress.
- Built and configured a functional online store including product catalog, navigation, and user experience.
- Delivered a complete client-ready web solution from requirements analysis to deployment.

Smart Tunisian Technoparks (S2T) – Software Developer Intern Aug 2023

- Enhanced key features of an innovation center management portal used for access control and resource administration.
- Improved user management, access control, and lab/workspace booking modules.
- Contributed to increasing portal reliability and usability for internal staff.

Office de la Marine Marchande et des Ports (OMMP) – Finance Intern Jan – Feb 2023

- Supported the finance department in daily accounting operations and financial reporting within a large

public institution.

Academic Projects

Integrated BI Project – EventZella Sep 2025 – Feb 2026

- Designed a Data Warehouse with SSMS.
- Built ETL pipelines with Talend for multi-source data (reservations, budgets, satisfaction, providers).
- Developed Power BI dashboards for KPIs (conversion, cancellations, revenues, satisfaction).
- Applied ML models for demand forecasting and anomaly detection.

Data Warehouse & BI – MIMIC-III Dataset Sep 2025 – Dec 2025

- Designed a medical data warehouse with SSMS.
- Built ETL pipelines with SSIS.
- Created Power BI dashboards for healthcare indicators and trends.

GenZ Financial Profile Analyzer – Machine Learning Project Sep 2025 – Dec 2025

- Segmented GenZ financial profiles using K-Means.
- Applied classification (Random Forest, Gradient Boosting) and regression models.
- Deployed interactive Streamlit app for savings/investment prediction.
- Dataset: 6000 individuals, 14 features.

WorldCultura – Flight Reservation Platform Jan 2025 – May 2025

- Built a full-stack flight booking system with a synchronized JavaFX desktop app and Symfony web application sharing a single database via JDBC.
- Developed the desktop interface with JavaFX and the web front-end with Symfony and JavaScript.
- Managed the project lifecycle using Agile methodology with GitHub Projects and Trello.

Skills

Data & BI: Data Warehousing, ETL (Talend, SSIS), Power BI (RLS, DAX), Tableau, Pandas, NumPy, Scikit-learn.

Big Data: Apache Spark (PySpark), distributed data processing.

Machine Learning: Data Preprocessing, Predictive Modeling, Supervised & Unsupervised Learning, Classification, Regression, Clustering, Gradient Boosting, Model Evaluation.

DevOps & MLOps: DevOps (Git, Docker, CI/CD), MLOps (model versioning, packaging and deployment).

Blockchain: Hedera Hashgraph (Hedera Token Service, testnet token demo), distributed ledger fundamentals.

ERP & CRM: Odoo, SAP, HubSpot CRM.

Programming: Python, Java, JavaScript, PHP, SQL, PL/SQL, C.

Frameworks: Spring Boot, Symfony, Flask, Angular, Streamlit.

Databases: SQL Server, Oracle, MySQL, MongoDB.

Tools: Git, SSMS, Airflow, n8n, Grafana, Ollama (local LLM).

Soft Skills: Communication, teamwork, critical thinking, time management, adaptability, presentation.

Languages: Arabic (Native), French (B2), English (B2).

Certifications

- Hedera Certified Developer Associate (HCDA) – The Hashgraph Association (2026)
- Hedera Certified Foundation (HCF) – The Hashgraph Association (2026)
- Hedera Business Foundation (HBF) – The Hashgraph Association (2026)
- Introduction to CRM with HubSpot – Coursera (2026)
- CCNA 2: Switching, Routing and Wireless Essentials – Cisco Networking Academy (2025)
